

In Brill's *Companion to the Reception of Presocratic Natural Philosophy in Later Classical Thought*, contributions by Gottfried Heinemann, Andrew Gregory, Justin Habash, Daniel W. Graham, Oliver Primavesi, Owen Goldin, Omar D. Alvarez Salas, Christopher Kurfess, Dirk L. Couprie, Tiberiu Popa, Timothy J. Crowley, Liliana Carolina Sanchez Castro, Iakovos Vasiliou, Barbara Sattler, Rosemary Wright and a foreword by Patricia Curd, explore the influences of early Greek science (6-4th c. BCE) on the philosophical works of Plato, Aristotle, and the Hippocratics.

Rather than presenting an unified narrative, the volume supports various ways to understand the development of the concept of nature, the emergence of science, and the historical context of topics such as elements, principles, soul, organization, causation, purpose, and cosmos in ancient Greek philosophy.

Chelsea C. Harry, Ph.D. (2013), Duquesne University, is Associate Professor of Philosophy at Southern Connecticut State University. She has published articles, reviews, and translations on natural philosophy, including the monograph *'Chronos in Aristotle's Physics-- On the Nature of Time'* (Springer, 2015).

Justin Habash, Ph.D. (2016), Duquesne University, is Assistant Dean for Teaching and Learning in the Carey Business School at Johns Hopkins University. He has published articles on early Greek nature philosophy.
